PROFESSIONAL SUMMARY

Junior Software Developer with an Engineering degree in Software Development and Management. Experience building web and mobile applications with React, Next.js and TypeScript, connected to real-time services and databases. During my time at Prologis I developed a PWA to digitize the capture and tracking of water and electricity readings in industrial properties, used by the maintenance team.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML5, and CSS3
Web and mobile: React, React Native, Next.js, Node.js, Express, Vite, Tailwind CSS, and Apache Cordova
Data and tools: Supabase, PostgreSQL, SQL Server, Firebase, Git/GitHub, Docker, Postman, Figma, and Arduino

EXPERIENCE

Prologis *Reynosa, Tamaulipas*
Maintenance Intern Jan 2026 – Aug 2026

- Developed a PWA pilot to centralize the capture, validation and review of water and electricity readings across industrial properties.
- Implemented role-based workflows, historical records, Excel imports, evidence uploads, QR access and printable reports using Next.js, React, TypeScript, Tailwind CSS and Supabase.
- Supported facility inspections and utility-reading follow-up, translating operational needs into application features.

Presidencia Municipal de Reynosa *Reynosa, Tamaulipas*
Administrative Assistant Feb 2025 – Oct 2025

- Reviewed online payments and organized files, procedures, property valuations, declarations and reports while handling confidential information accurately.
- Assisted citizens and routed requests to the appropriate departments.

IPSUM Technology *Remote*
IT Intern Sep 2024 – Nov 2024

- Developed a prototype online-learning platform with React, JavaScript, Tailwind CSS and Firebase.
- Completed basic ServiceNow configuration and familiarization exercises.

SELECTED PROJECTS

- Academic Planning Dashboard: Contributed to a platform that processes academic documents, visualizes teaching workloads and generates reports with ExcelJS, PDF.js and Mammoth. Tech: React, Vite, Node.js, Express, SQL Server, JWT and Docker.
- FitLink: Developed a mobile application connected to a wearable prototype to display physical-activity and sensor data synchronized in real time. Tech: React Native, Expo, Firebase, Arduino and Figma.
- Stenovy: Developed a mobile application for registering student attendance through QR codes. Tech: Apache Cordova, Firebase, JavaScript, HTML and CSS.

EDUCATION, CERTIFICATIONS AND LANGUAGES

- **Education:** Engineering Degree in Software Development and Management, UTTN (Jan 2025 – Aug 2026) | Higher University Technician in IT, Multiplatform Software Development, UTTN (Aug 2022 – Dec 2024)
- **Certifications:** Google Cloud Computing Foundations (2024) | IoT Fundamentals: Connecting Things (2024) | Cisco Networking Essentials (2023)
- **Languages:** Native Spanish | English B2 (CEFR)
